Burkeville Independent School District Belief Statement

Burkeville ISD believes that the best philosophy of education is expressed by objectives that can be evaluated and communicated. Our school district dedicates itself to the concept that each individual is a unique personality capable of developing spiritual and moral values. It is further believed that each individual is capable of experiencing success and acquiring enthusiasm in the following ways.

Intellectual - the ability to think and act logically and constructively while critically reasoning independently;

Social - a belief in the dignity and worth of each person, and understanding of the common needs of people, and appreciation of American citizenship with its individual freedoms and responsibilities;

Physical - progress in health and environment and an understanding of appropriate and efficient use of time;

Economic and Occupational Competence - training that is broad in scope, yet flexible in content.

Therefore, our philosophy is a belief that excellence in education is best achieved by maintaining high standards for discipline, by providing staff, faculty, and facilities of the highest quality and by providing standards of testing and counseling that will allow individuals to make decisions that favorably impact their lives.

Eight Components of a Title 1 Schoolwide Program
Burkeville ISD has three campuses:
Burkeville Elementary School – Title 1 Schoolwide
Burkeville Middle School – Title 1 Schoolwide
Burkeville High School – Title 1 Schoolwide

From <http://www.ed.gov/legislation/ESEA/sec1114.html>

SEC. 1114. SCHOOLWIDE PROGRAMS.

(a) Use of Funds for Schoolwide Programs.--

(1) In general.--A local educational agency may use funds under this part, in combination with other Federal, State, and local order to upgrade the entire educational program in a school described in subparagraph (A) or (B) if, for the initial year of the schoolwide program, the school meets either of the following criteria:

(A) For the school year 1995-1996--

- (i) the school serves an eligible school attendance area in which not less than 60 percent of the children are from low income families; or
- (ii) not less than 60 percent of the children enrolled in the school are from such families.

(B) For the school year 1996-1997 and subsequent years--

- (i) the school serves an eligible school attendance area in which not less than 50 percent of the children are from low income families; or
- (ii) not less than 50 percent of the children enrolled in the school are from such families.

(2) State assurances.--

(A) A local educational agency may start new schoolwide programs under this section only after the State educational agency provides written information to each local educational agency in the State that demonstrates that such State agency has established the statewide system of support and improvement required by subsections (c)(1) and (e) of section 1117.

(B) A school that desires to initiate a schoolwide program under this section prior to the establishment of the statewide system of support and improvement required in subsections (c)(1) and (e) of section 1117 shall demonstrate to the local educational agency that such school has received high quality technical assistance and support from other providers of assistance, including comprehensive technical assistance centers, regional laboratories, institutions of higher education, educational service agencies, or other local consortia.

(3) Identification.--

(A) No school participating in a schoolwide program shall be required to identify particular children under this part as to participate in a schoolwide program or to provide supplemental services to such children.

(B) A school participating in a schoolwide program shall use funds available to carry out this section only to supplement amount of funds that would, in the absence of funds under this part, be made available from non-Federal sources for school, including funds needed to provide services that are required by law for children with disabilities and children with limited English proficiency.

(4) Special rule.--

(A) Except as provided in subsection (b), the Secretary may, through publication of a notice in the Federal Register, exempt schoolwide programs under this section from statutory or regulatory provisions of any other noncompetitive formula program administered by the Secretary, or any discretionary grant program administered by the Secretary (other than title I or discretionary grant programs under the Individuals with Disabilities Education Act), to support schoolwide program if the intent and purposes of such other programs are met.

(B) A school that chooses to use funds from such other programs shall not be relieved of the requirements relating to safety, civil rights, gender equity, student and parental participation and involvement, services to private school children, maintenance of effort, comparability of services, uses of Federal funds to supplement, not supplant non-Federal funds, or the distribution of funds to State or local educational agencies that apply to the receipt of funds from such programs.

(5) Professional development.--Each school receiving funds under this part for any fiscal year shall devote sufficient resources to effectively carry out the activities described in subsection (b)(1)(D) in accordance with section 1119 for such fiscal year, except that a school may enter into a consortium with another school to carry out such activities.

(b) Components of a Schoolwide Program.--

(1) In general.--A schoolwide program shall include the following components:

(A) A comprehensive needs assessment of the entire school that is based on information on the performance of children in relation to the State content standards and the State student performance standards described in section 1111(b)(1).

(B) Schoolwide reform strategies that--

(i) provide opportunities for all children to meet the State's proficient and advanced levels of student performance described in section 1111(b)(1)(D);

(ii) are based on effective means of improving the achievement of children;

(iii) use effective instructional strategies, which may include the integration of vocational and academic learning (including applied learning and team teaching strategies), that--

- (I) increase the amount and quality of learning time, such as providing an extended school year and before and after-school and summer programs and opportunities, and help provide an enriched and accelerated curriculum; and
 - (II) include strategies for meeting the educational needs of historically underserved populations, including girls and women;
- (iv)
- (I) address the needs of all children in the school, but particularly the needs of children who are members of the target population of any program that is included in the schoolwide program, which may include:
 - (aa) counseling, pupil services, and mentoring services;
 - (bb) college and career awareness and preparation, such as college and career guidance, comprehensive career development, occupational information, enhancement of employability and occupational skills, personal finance education, job placement services, and innovative teaching methods which may include applied learning and team teaching strategies;
 - (cc) services to prepare students for the transition from school to work, including the formation of partnerships between elementary, middle, and secondary schools and local businesses, and the integration of school-based and work-based learning; and
 - (dd) incorporation of gender-equitable methods and practices; and
 - (II) address how the school will determine if such needs have been met; and
- (vii) are consistent with, and are designed to implement, the State and local improvement plans, if any, approved under title III of the Goals 2000: Educate America Act.
- (C) Instruction by highly qualified professional staff.
- (D) In accordance with section 1119 and subsection (a)(5), professional development for teachers and aides, and, where appropriate, pupil services personnel, parents, principals, and other staff to enable all children in the school to meet the student performance standards.
- (E) Strategies to increase parental involvement, such as family literacy services.
- (F) Plans for assisting preschool children in the transition from early childhood programs, such as Head Start, Even Start State-run preschool program, to local elementary school programs.
- (G) Measures to include teachers in the decisions regarding the use of assessments described in section 1112(b)(1) in order to provide information on, and to improve, the performance of individual students and the overall instructional program.
- (H) Activities to ensure that students who experience difficulty mastering any of the standards required by section 1112 during the course of the school year shall be provided with effective, timely additional assistance, which shall include
- (i) measures to ensure that students' difficulties are identified on a timely basis and to provide sufficient information on which to base effective assistance;

- (ii) to the extent the school determines feasible using funds under this part, periodic training for teachers in how to identify such difficulties and to provide assistance to individual students; and
- (iii) for any student who has not met such standards, teacher-parent conferences, at which time the teacher and parent shall discuss--
 - (I) what the school will do to help the student meet such standards;
 - (II) what the parents can do to help the student improve the student's performance; and
 - (III) additional assistance which may be available to the student at the school or elsewhere in the community.

(2) Plan.--

- (A) Any eligible school that desires to operate a schoolwide program shall first develop (or amend a plan for such a program that was in existence before the date of enactment of the Improving America's Schools Act of 1994), in consultation with the local educational agency and its school support team or other technical assistance provider under subsections (c)(1) and (2) of section 1117, a comprehensive plan for reforming the total instructional program in the school that--
 - (i) incorporates the components described in paragraph (1);
 - (ii) describes how the school will use resources under this part and from other sources to implement those components;
 - (iii) includes a list of State and local educational agency programs and other Federal programs under subsections (c)(1) and (2) of section 1117 that will be included in the schoolwide program;
 - (iv) describes how the school will provide individual student assessment results, including an interpretation of such results, to the parents of a child who participates in the assessment required by subsection (c)(3) of section 1111(b);
 - (v) provides for the collection of data on the achievement and assessment results of students disaggregated by major ethnic or racial groups, limited English proficiency status, migrant students, and by children with disabilities compared to other students, and by economically disadvantaged students as compared to students who are not economically disadvantaged;
 - (vi) seeks to produce statistically sound results for each category for which assessment results are disaggregated through the use of oversampling or other means; and
 - (vii) provides for the public reporting of disaggregated data only when such reporting is statistically sound.
- (B) Plans developed before a State has adopted standards and a set of assessments that meet the criteria in paragraph (3) of section 1111(b) shall be based on an analysis of available data on the achievement of students in the school and on instructional and school improvement practices.
- (C) The comprehensive plan shall be--
 - (i) developed during a one-year period, unless--
 - (I) the local educational agency, after considering the recommendation of the technical assistance provider under subsections (c) and (e) of section 1117, determines that less time is needed to develop and implement the schoolwide program; or

- (II) the school is operating a schoolwide program on the day preceding the date of enactment of the Improving America's Schools Act of 1994, in which case such school may continue to operate such program, but may develop a new plan during the first year of assistance under such Act to reflect the provisions of this section;
- (ii) developed with the involvement of the community to be served and individuals who will carry out such plan, including teachers, principals, other staff, and, where appropriate, pupil services personnel, and parents, and, if such plan relates to a secondary school, students from such school;
- (iii) in effect for the duration of the school's participation under this part and reviewed and revised, as necessary, by the school;
- (iv) available to the local educational agency, parents, and the public, and the information contained in such plan may be translated, to the extent feasible, into any language that a significant percentage of the parents of participating children in the school speak as their primary language; and
- (v) where appropriate, developed in coordination with programs under the School-to-Work Opportunities Act, the Carl D. Perkins Vocational and Applied Technology Education Act, and the National and Community Service Act of 1990.

(c) Accountability.--A schoolwide program under this section shall be subject to the school improvement provisions of section 1116.

9.2.3.2 Local Criteria for Identification of Students in At-Risk Situations

Under local policies, districts may add local criteria to those listed in [Texas Education Code Section 29.081](#). For example, a district may implement local criteria in order to include other students that may fall below grade level because of extenuating circumstances, such as students residing in a homeless shelter or a shelter for battered women. In order to appropriately charge to the state compensatory education allotment supplemental for services provided to children identified under local criteria, a district should be able to explain that children identified under local criteria are added to a listing of children that were identified under Texas Education Code Section 29.081. This means that the state compensatory education allotment may not be used to serve students on a particular campus under local criteria, if a district has not identified any students on the same campus that meet any of the criteria in [Texas Education Code Section 29.081](#).

Some judgment is involved when applying local criteria. The larger the proportion of students identified under local criteria in comparison to students identified under the criteria in Texas Education Code Section 29.081, then it will be more difficult to defend the use of local criteria. If local criteria appear to involve more than an incidental benefit to other students then there would be an adverse consequence to students in at-risk situations meeting the criteria in [Texas Education Code Section 29.081](#).

Students in at-risk situations reported through PEIMS must meet the state criteria. Although districts may use additional local criteria to identify students in at-risk situations, students identified using local criteria are not to be reported on PEIMS.

BURKEVILLE SPECIAL PROGRAMS

Our school district provides a variety of special programs to meet the diverse needs of our students:

Curriculum Based Software Programs

* Odysseyware	K-12	After school/credit retrieval/ 8 th period
* Compass Learning	K-12	Prescriptive/ Individualized Instruction/ Remediation
* Reading/Writing/Math

**Burkeville School District
Long Term Vision Statement**

community—who recognize that excellence is the standard by which all teaching and learning must be measured.

While each student in Burkeville ISD is valued as an individual, excellent educational opportunities for all students must be ensured. Burkeville ISD

Teachers will serve as facilitators who enable students to think critically, and to synthesize and evaluate information. Teachers will promote respect

Parents and community members will know their knowledge, experiences, and opinions are respected. They will support the District and its students

Burkeville ISD students will recognize the value of life-long education and will become leaders with an intense drive for excellence.

ryone to seek and attain excellence

while creating personal dreams and a vision for the future.

Assessment of Knowledge and Skills (TAKS) reading, writing, math, science, and social studies tests will meet state passing standards. Students t

ment.

l state assessment in reading and math will increase to show continuing advancement toward grade level.

D will provide a pleasant, safe environment where each student will develop the skills necessary to be a productive citizen of the Twenty-first Century and self-esteem for everyone. Burkeville ISD will provide a core curriculum that will include the most current technology as an integral component through active involvement in classrooms, programs, and organizations.

aking the Alternative Assessment will meet the ARD expectation.

ry.

it. Opportunities for student experiences in art and music will be expanded. The goal of all school activities will be high student achievement. To

this end, teachers will build collegial and collaborative relationships with fellow professionals and other adults of the District.
